

# Adham Khaled

Ismailia, Egypt | +20 1015539329 | [engadhamelsayed@gmail.com](mailto:engadhamelsayed@gmail.com) | [github.com/IbnTaymiyyah](https://github.com/IbnTaymiyyah) | [linkedin.com/in/ibntaymiyya](https://linkedin.com/in/ibntaymiyya)

## Education

### Suez Canal University

Ismailia, Egypt

Bachelor of Science (B.Sc.), Computer Science – Software Engineering

Jul 2025

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Computer Networks, Operating Systems

## Certifications

**Cisco Networking Academy** : Networking Basics (Currently pursuing CCNA via Creativa)

## Experience

### FlyRank AI

Remote

Backend AI Engineering Intern

Jul 2026 – Present

- Designing AI backend workflows, defining API contracts, and handling failure modes for AI-driven services.
- Implementing retrieval-backed answer flows (RAG) and structured-output pipelines using **Java** and **Spring Boot**.
- Developing evaluation sets and rubrics to assess model output quality, reliability, and grounding.

## Projects

### GYM Management System | Java 21, JavaFX, MySQL, Gradle

[github.com/IbnTaymiyyah/GYM-Management-System](https://github.com/IbnTaymiyyah/GYM-Management-System)

- Developed a desktop application using **Java 21** and **JavaFX**, following the **MVC** pattern and managing builds with **Gradle**.
- Designed a **MySQL** schema with 7 tables and automated database initialization via stored procedures on startup.
- Implemented Role-Based Access Control (**RBAC**) and built a real-time analytics dashboard using **TilesFX** for data visualization.
- Enabled data portability by integrating **Apache POI** and **OpenCSV** for Excel and CSV export/import operations.

### UniHealth – University Healthcare Management System | ASP.NET Core 9, EF Core, SQL Server

[github.com/IbnTaymiyyah/UniHealth](https://github.com/IbnTaymiyyah/UniHealth)

- Architected a healthcare management RESTful API using **ASP.NET Core 9** and **EF Core**; designed SQL Server schema with complex relationships for 3 user roles.
- Implemented secure authentication with **JWT** and claims-based authorization via **ASP.NET Identity**; integrated IP-based rate limiting and SMTP recovery flows.
- Engineered clean DTO mapping using **AutoMapper** and integrated **Swagger/OpenAPI** documentation to facilitate frontend integration.

## E-Commerce RESTful API (In Progress) | *Spring Boot, JPA, PostgreSQL*

[github.com/IbnTaymiyyah/SallaShop](https://github.com/IbnTaymiyyah/SallaShop)

- Developing a scalable e-commerce backend using **Spring Boot**, **Spring MVC**, and **PostgreSQL**.
- Implementing robust persistence layer with **Spring Data JPA** and **Hibernate**, with DTO mapping using **MapStruct**.
- Applying test-driven development using **JUnit 5**, **Mockito**, and **Spring MockMVC** to ensure API reliability.

### Technical Skills

---

**Languages:** Java, C#, SQL, HTML, CSS

**Frameworks & Libraries:** Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, MapStruct, Lombok, .NET 9, ASP.NET Web API, Entity Framework

**Databases & Tools:** MySQL, SQL Server, PostgreSQL, Git, GitHub, Postman, Maven, IntelliJ IDEA

**Testing:** JUnit 5, Mockito, Spring MockMvc

**Concepts:** OOP, SOLID Principles, REST APIs, JWT Authentication, Dependency Injection

### Soft Skills

---

• **Problem Solving**   • **Self-Learning**   • **Teamwork**   • **Adaptability**   • **Time Management**

### Activities

---

#### Microsoft Student Club – Suez Canal University

2025

*Backend Member*

- Advanced **.NET** backend skills through a structured technical season, culminating in developing the **UniHealth** system as a team capstone project

#### ICPC (International Collegiate Programming Contest)

2022

*Problem Solving Trainee*

- Trained in advanced algorithms and data structures; participated in local qualifiers and competitive programming contests

### Languages

---

**Arabic:** Native | **English:** Intermediate
